

"Drill through the hardest surfaces with ease"

## Comparison of the PorcelainPlus Cyclone® and PorcelainPlus Speedbit®

The PorcelainPlus tungsten carbide bits were specifically designed for drilling quickly and efficiently through porcelain, glass, masonry, and other hard surfaces for a variety of applications. Although they are used for many of the same applications, there are some differences that should be noted (especially speed):

### **PorcelainPlus Cyclone®**

- Masonry Style Multipurpose Tip
- Cordless Drill or Hammer Drill
- Porcelain, **Masonry**, Granite, Marble & more
- Drill speed: 600 rpms
- Firm/Hard Pressure
- Clean holes

### **PorcelainPlus Speedbit®**

- Spear Tip
- Cordless Drill Only (no Hammer)
- Porcelain, **Glass**, Granite, Marble & more
- Drill speed: 2,300 rpms
- Firm Pressure
- Extremely clean, precise holes
- Best for no wandering on start up

#### **RECOMMENDED FOR USE ON:**

- Porcelain Tile
- Granite
- Marble
- Quartz
- Brick
- Concrete Block
- Ceramic Tile
- Glass Tile\*
- Glass\*
- Mirrors\*
- Crystallized Glass\*

\*Substrates the Speedbit is recommended over the Cyclone.
